Professional Summary

Software Engineer and Solution Consultant with experience delivering full-stack applications and platform capabilities across client and internal products. Comfortable working end to end - from technical discovery and architecture through implementation, testing, cloud infrastructure, deployment, and handover. Strongest in .NET/Kotlin/Java backend systems, TypeScript frontends, AWS/Azure, and pragmatic engineering practices.

Professional Experience

Sahaj Software

Solution Consultant | Jan 2024 - Present

- Deliver full-stack and platform-engineering work across internal products and client engagements, contributing from discovery and technical discussions through development, testing, deployment, and handover.
- Work in rigorous agile teams with strong emphasis on engineering quality, sustainable delivery, collaboration, and client communication.

Internal Marketing-Automation Platform | Apr 2024 - Apr 2025

- Helped establish a marketing platform for publishing blogs, client stories, and event landing pages to the company's public WordPress-based website as one of the initial team members.
- Built across backend microservices in Kotlin/Spring Boot, a Next.js/TypeScript frontend, and PostgreSQL on Amazon RDS.
- Provisioned AWS resources with Terraform and supported service delivery on Amazon EKS with Argo CD; implemented authentication with Keycloak.
- Worked across the product lifecycle in a team that evolved from 14 members to a focused 7-8 person delivery team, including development, testing, deployment, and handover.

InvolveMint - Circular Economy PWA | Sep 2025 - Nov 2025

- Built the foundation for v2 of a mobile-friendly PWA supporting an internal eco-friendly circular economy in the Pittsburgh community.
- Worked as one of two engineers over a 10-week engagement, translating a new set of fundamental requirements into a maintainable application foundation using React Router v7.

Middleware Platform - Major Indian Tyre Manufacturer | Jun 2026 - Present

- Building middleware that connects an existing SAP system with external software and establishes a business-event repository to support future analytics.
- Contributing in a four-person team with Java/Spring Boot as the primary stack and Jio-Azure as the cloud platform.

Technical Skills

Languages: Kotlin, Java, TypeScript, JavaScript, Python, C#

Backend: Spring Boot, Micronaut, ASP.NET Core, Node.js

Frontend: Next.js, React, React Router, Angular, Blazor

Cloud & Platform: AWS, Azure, Terraform, Docker, Kubernetes, EKS, Argo CD

Data & Identity: PostgreSQL, Amazon RDS, MySQL, Keycloak

AI-assisted development: Cursor, GitHub Copilot, Claude Code

Education

B.E. Computer Science and Engineering | RMK Engineering College

2020 - 2024 | CGPA: 9.27

Selected Projects

Glance - Fingerprint-based attendance system for MGNREGA workers; built web (Blazor), Windows (WPF), and mobile (Flutter) applications integrating the MFS100 fingerprint sensor.

Presence - Advanced attendance tracking system that builds employee shift charts and periodically records attendance from fingerprint devices.

Novel Infinite - Social platform for sharing projects and blogs, built for an intra-department competition.

Hardware Asset Inventory - ASP.NET Core project developed as part of Smart India Hackathon 2022.

Library Management System - Blazor and ASP.NET Core application designed around Clean Architecture principles.

Earlier Experience

Infosys Springboard | Software Engineering Intern | Jan 2023 - May 2023

- Built an Angular frontend and .NET backend for an educational website.

Apollo Supply Chain Pvt. Ltd., Guindy | Software Engineering Intern | Jul 2022 - Aug 2022

- Built an internal self-service portal using Blazor, ASP.NET Core, and MySQL.

Achievements

- Finalist, Smart India Hackathon 2022
- 1st prize, intra-department mini-project competition (2nd year)
- 2nd prize, intra-department mini-project competition (3rd year)
- Google Kick Start 2022 Round G participant (rank 5541)

Additional Interests

Platform engineering, developer tooling, DevOps, cloud infrastructure, containers, desktop development, and technical writing.
